

RYCO FILTERS

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA414M

TOYOTA LANDCRUISER DIESEL VDJ70 SERIES, 1VDFTV 05/2007 ON.

The cabin filter is located right behind the glove box. To get access to the filter it has to be removed. Follow the instructions as follows

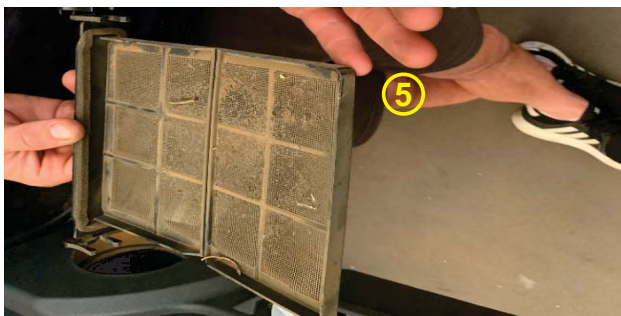

Open the glove box completely and with both hands on each top corner and slide your fingers so force can be applied towards the inside to unhinge the retaining lugs and therefore be able to remove the unit.

For accessing the cabin filter housing the air duct needs to be removed. With both hands on each side apply force and squeeze to remove the air duct.

Proceed to unclip on both side to remove the cabin air filter tray.

Cabin air filter tray looks as shown in above picture. Clean the area and slide in the new cabin air filter making sure it is facing in the right air flow direction indicated on the filter. Refit all the components in reverse order.
